2. Upload an 5 images to ibm object storage and make it public. write html code to displaying all the 5 images.

Index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Smart Fashion shop</title>
  <link rel="stylesheet" href="https://flask-plasma1.s3.jp-tok.cloud-object-storage.appdomain.cloud/index.css">
  <style>
    body{
      background-color: aqua;
      display: flex;
      align-items: center;
      justify-content: center;
      flex-direction: column;
    }
    img{
      height: 240px;
      border-radius: 10px;
      margin: 10px;
    }
  </style>
</head>
<body>
  <h1>Welcome to Image Gallery</h1>
```

```
<div>
  
  
  
  
  
</div>
<script>
  window.watsonAssistantChatOptions = {
    integrationID: "3a3031a0-6417-4ea1-8d7f-aa027a707ff4", // The ID of this
integration.
    region: "jp-tok", // The region your integration is hosted in.
    serviceInstanceID: "83cc55ca-5fdb-4ffd-b11a-cebe2fab5f4d", // The ID of
your service instance.
    onLoad: function(instance) { instance.render(); }
  };
  setTimeout(function() {
    const t=document.createElement('script');
    t.src="https://web-
chat.global.assistant.watson.appdomain.cloud/versions/" +
(window.watsonAssistantChatOptions.clientVersion || 'latest') +
"/WatsonAssistantChatEntry.js";
    document.head.appendChild(t);
  });
</script>

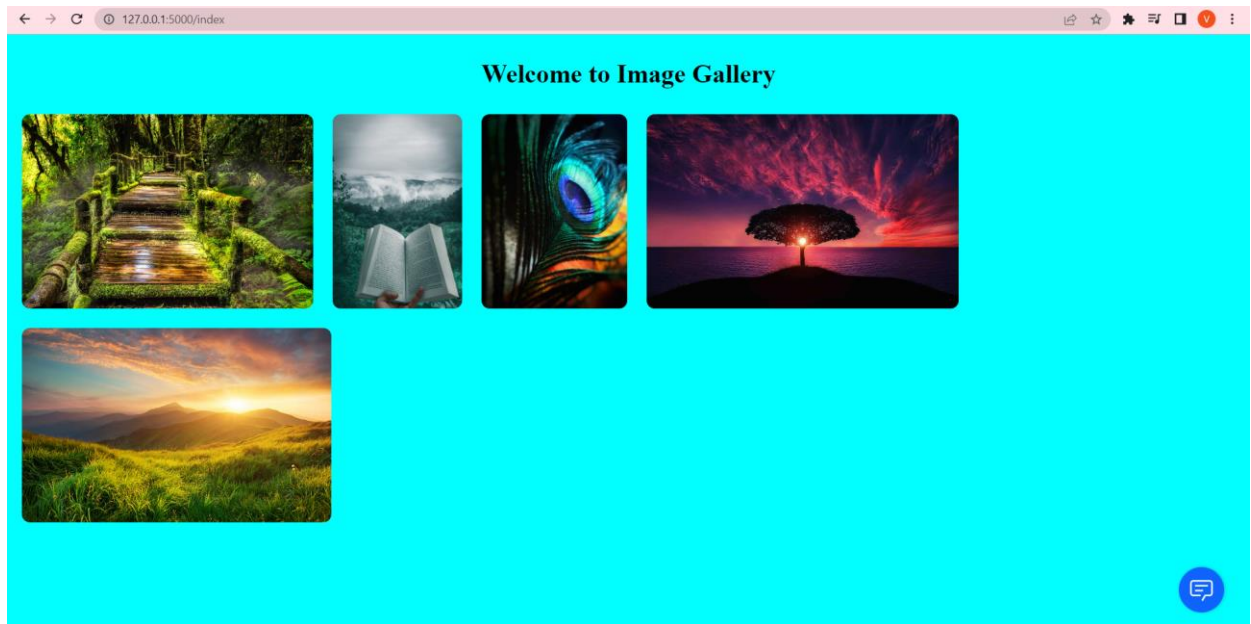

</body>
</html>
```

3. Upload a css page to the object storage and use the same page in your HTML code.

```
4.<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Smart Fashion shop</title>
  <link rel="stylesheet" href="https://flask-plasma1.s3.jp-tok.cloud-
object-storage.appdomain.cloud/index.css">
</head>
<body>
  <h1>Welcome to Image Gallery</h1>
  <div>
    
    
    
    
    
  </div>
</body>
</html>
```

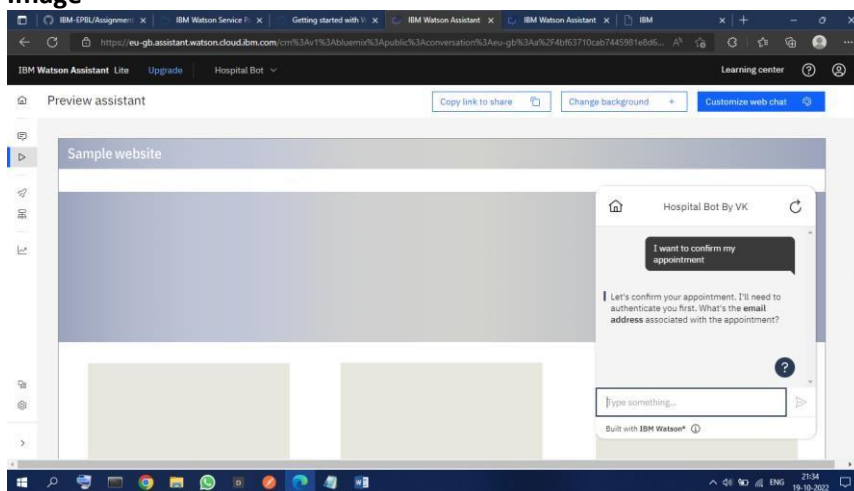

Output:

5. Design a chatbot using IBM Watson assistant for hospital. Ex: User comes with query to know the branches for that hospital in your city. Submit the web URL of that chat bot as a assignment.

Url :- [chatbot link](#) <- click

Image-

5 .Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page

The screenshot displays the IBM Watson Assistant Lite interface. The top navigation bar includes 'IBM Watson Assistant Lite', 'Upgrade', 'testingbot', and 'Learning center'. The main title is 'Check upcoming payment'. On the left, the 'Conversation steps' panel shows four steps: 1. 'enter name' (Free text), 2. 'enter mobile number' (Number), 3. 'thank you' (Confirmation), and 4. 'You can check your payment due date by logging into your account [here](https://www.ibm.com), an...'. The main area, 'Customer starts with:', provides instructions on how to start a conversation and lists 26 phrases that can trigger the action. A 'Preview' button is located at the bottom right.

This screenshot shows the same IBM Watson Assistant Lite interface as the previous one, but with a 'Preview' window open on the right. The preview window shows a chat interface with a 'Greet customer [default]' message, a 'Welcome, how can I assist you?' response, and a 'Check upcoming payment recognized' message. The 'enter name' step is visible in the chat history. The 'Preview' window also includes a 'Type something...' input field and a 'Send' button.
