

Assignment - 3

Bucket And Watson assistant

Assignment Date	31 October 2022
Student Name	VISHAAMBER R A
Student Roll Number	1919102191
Maximum Marks	2 Marks

Questions:

1. Create a Bucket in IBM object storage.

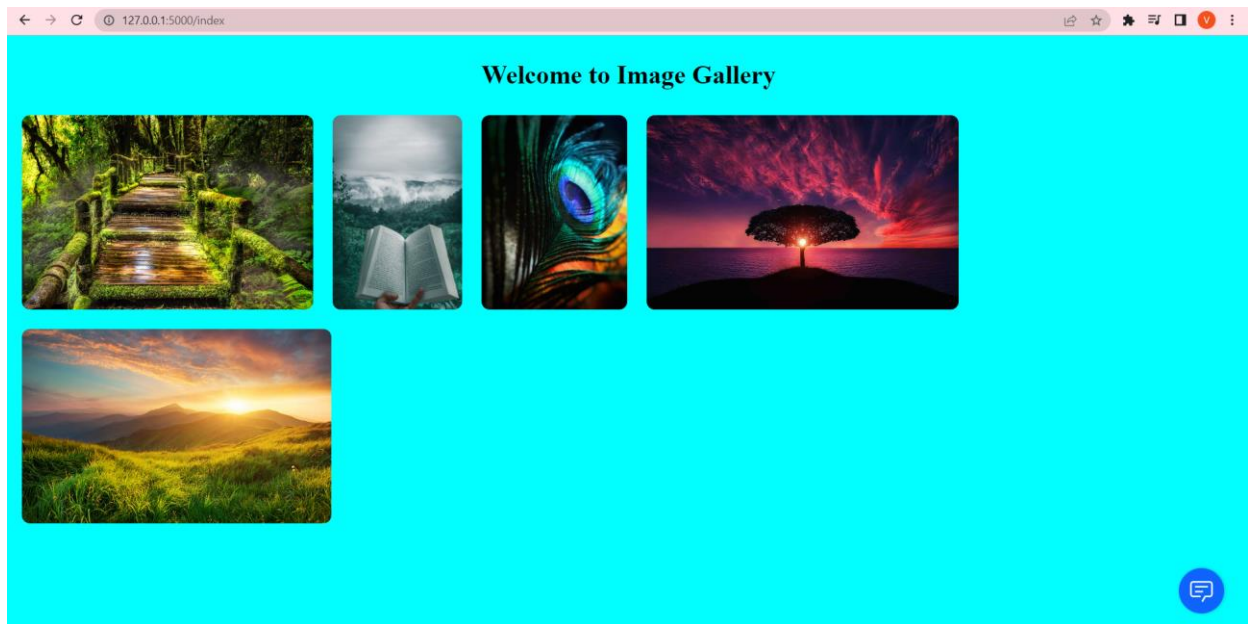

2. Upload an 5 images to ibm object storage and make it public. write html code to displaying all the 5 images.

Index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Smart Fashion shop</title>
  <link rel="stylesheet" href="https://flask-plasma1.s3.jp-tok.cloud-object-storage.appdomain.cloud/index.css">
  <style>
    body{
      background-color: aqua;
      display: flex;
      align-items: center;
      justify-content: center;
      flex-direction: column;
    }
    img{
      height: 240px;
      border-radius: 10px;
      margin: 10px;
    }
  </style>
</head>
<body>
  <h1>Welcome to Image Gallery</h1>
```

```
<div>
  
  
  
  
  
</div>
<script>
  window.watsonAssistantChatOptions = {
    integrationID: "3a3031a0-6417-4ea1-8d7f-aa027a707ff4", // The ID of this
integration.
    region: "jp-tok", // The region your integration is hosted in.
    serviceInstanceID: "83cc55ca-5fdb-4ffd-b11a-cebe2fab5f4d", // The ID of
your service instance.
    onLoad: function(instance) { instance.render(); }
  };
  setTimeout(function() {
    const t=document.createElement('script');
    t.src="https://web-
chat.global.assistant.watson.appdomain.cloud/versions/" +
(window.watsonAssistantChatOptions.clientVersion || 'latest') +
"/WatsonAssistantChatEntry.js";
    document.head.appendChild(t);
  });
</script>

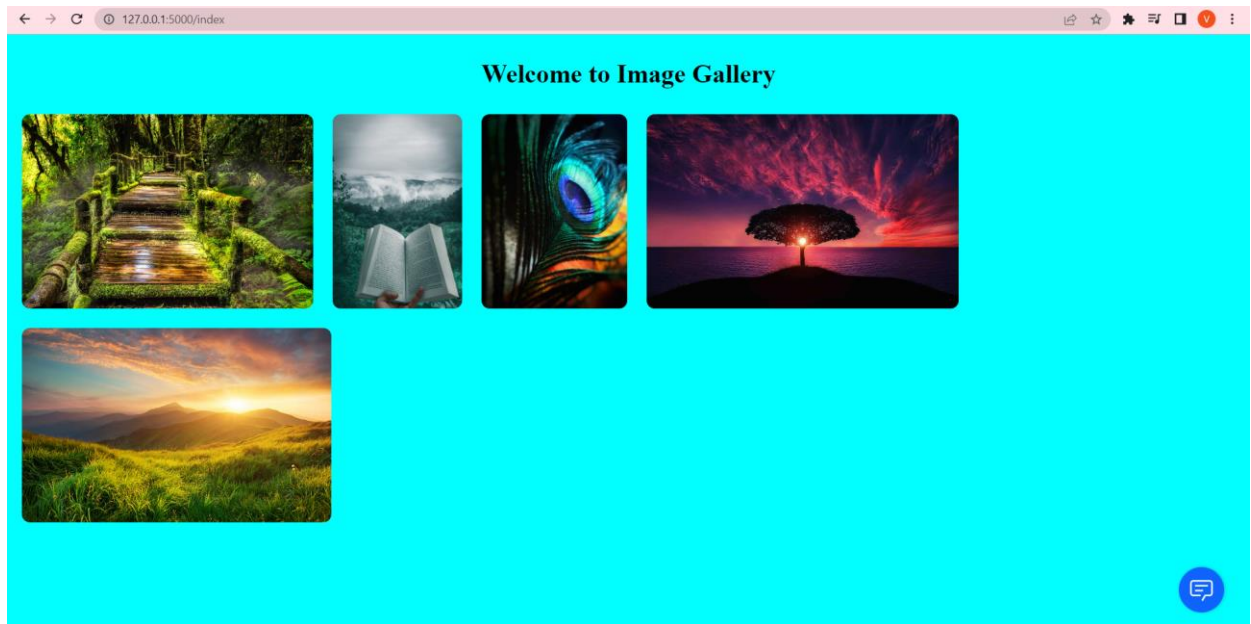

</body>
</html>
```

3. Upload a css page to the object storage and use the same page in your HTML code.

```
4.<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Smart Fashion shop</title>
  <link rel="stylesheet" href="https://flask-plasma1.s3.jp-tok.cloud-
object-storage.appdomain.cloud/index.css">
</head>
<body>
  <h1>Welcome to Image Gallery</h1>
  <div>
    
    
    
    
    
  </div>
</body>
</html>
```

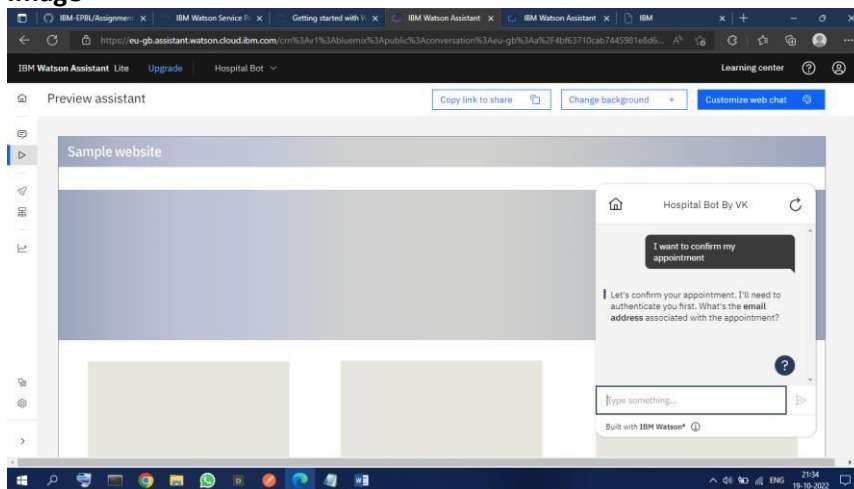

Output:

5. Design a chatbot using IBM Watson assistant for hospital. Ex: User comes with query to know the branches for that hospital in your city. Submit the web URL of that chat bot as a assignment.

Url :- [chatbot link](#) <- click

Image-

5 .Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page

The screenshot shows the IBM Watson Assistant configuration interface. The title bar indicates the current action is 'Check upcoming payment'. On the left, the 'Conversation steps' panel lists four steps: 1. 'enter name' (Free text), 2. 'enter mobile number' (Number), 3. 'thank you' (Confirmation), and 4. A completion message about checking payment due dates. The main panel, 'Customer starts with:', provides instructions on how to define phrases for the action and lists 26 example phrases such as 'hi', 'When is my premium due', and 'when is my bill due for my policy'. A 'Preview' button is located at the bottom right.

This screenshot shows the same configuration interface as above, but with a 'Preview' window open on the right. The preview window displays a simulated conversation flow: it starts with a 'Greet customer' action, followed by a 'Welcome' message, then the 'Check upcoming payment' action which triggers the 'enter name' step. The preview window includes a text input field at the bottom for testing the assistant's response.
