Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \wp

1 Phases	Create the user	Setting up details of bank accounts and	Entering income details to track how much they spend and	Attaching mail account in order to receive reports over a week / month / year according to their preference
gh-level steps your user needs to complish from start to finish	account	other finance sources	much they spend and save	month / year according to their preference
Steps	User mobile number/email to	Entering the	Creating	Analyzing the reports in intervals
ailed actions your user has to form	and setting up the profile	daily to keep track of them	categories for expenses	to get an idea of where they are spending their money
Feelings	It is easy to	May be I should	I can see	I can use the reports to
at your user might be thinking and ling at the moment	account with	stop spending my money on (unnecessary	where my money is	design the budget better
	number	expenses)	going	this time
	Is it secure to		user interface	Looking into the
		Keeping track	user interface	Looking into the expenses and figuring
